【Specimen】

SDGs Pellet Carbon SDG-7

【Test items】

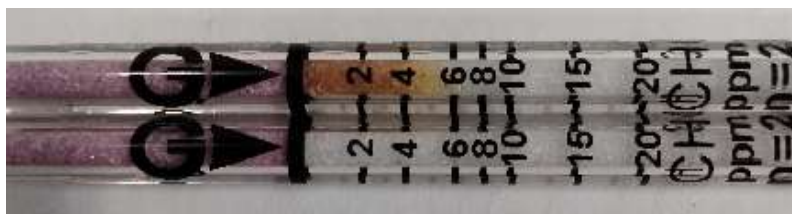

Formaldehyde gas adsorption test

【Test Summary】

10 g of sample and 5 ppm of formaldehyde gas were placed in a 2L plastic bag, and measured with a detector tube after 1 hour.

【Test Results】

Gas to be tested	Initial concentration (ppm)	After 1 hour (ppm)	Removal rate
Formaldehyde	5	< 1	99% or more

Formaldehyde
